

PUBLIC NOTICE

Automation of Customs Clearance Certificates on Imported Motor Vehicles

The Zimbabwe Revenue Authority (ZIMRA) wishes to advise its valued clients that it is automating the generation of Custom Clearance Certificates for all imported new or second hand motor vehicles.

This new development is meant to improve the turnaround time for clearance of motor vehicles at Ports of entry and to plug out revenue leakages by removing manual capturing of Customs Clearance Certificates.

ZIMRA therefore, advises all importers who intend to import new or second hand motor vehicles into the country to have the following motor vehicle details on supporting documents such as invoices and bills of lading before submitting their declaration to ZIMRA:

- Engine number
- Chassis Number
- Make and Model
- Year of Manufacture

This information is required for capturing on the bills of entry so that the Customs Clearance Certificate generates automatically from the system.

Your cooperation in this regard is encouraged to make this new noble initiative a success.

Public Notice 73 of 2020.
